

Replacement Keyed Retainer and Kit for ErgoNOW™ Bottle System Connector

The ErgoNOW bottle system connector keyed retainer provides misconnect prevention when dispensing material using the ErgoNOW connector and the matching key-coded SmartCap™ closure

The keyed retainer component of the ErgoNOW™ connector helps ensure that the correct material is dispensed when using the ErgoNOW connector in conjunction with the SmartCap™ closure. The connector snaps into place only when the connector and closure key codes match. The replacement retainer kit allows customers the flexibility to update their connector with a new chemical key code.

APPLICATION

- ErgoNOW connector key codes are field updatable to align with a new customer chemical or material

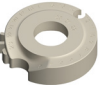

ErgoNOW keyed retainer

FEATURES & BENEFITS

- Customers can reuse their ErgoNOW dispense connector for a different chemical by replacing the key-coded retainer, saving money and reducing waste
- Key-coded systems help prevent dispensing the wrong material
